Laura THAY

Looking for my next apprenticeship (3 weeks/ 1 week at school) starting from September 2022 with Hetic web school in master CTO & lead development.

Got my diploma from Les Descodeuses, first coding school for women in France to solve the problem of parity because everything is better mixed (only 10% of woman in the tech industry)

Did a 2-year world tour after graduating from my master's degree in digital marketing.
I developed a passion for project creation.

Skills Summary

- English
- HTML5/CSS3
- Wordpress
